**SCOPE OF WORK**

If specifically not mentioned hereinafter or not mentioned anywhere else, the scope of work for “**Transformer oil replacement and filtration of Reactor-3 in CPP**” shall include but not be limited to the following:

**Scope of Work**

The contractor shall arrange and supply the oil de hydration machine of good quality and performance, vacuum pumps, necessary hoses, pipes, drums and other materials required for the retro filling work. The contractor will arrange for transportation of the required machines and tools for the job to the factory and after the job is over the contractor will arrange for transportation of the same materials from the factory to the outside. In all conditions machines and equipments will be under supervision of the contractor. In case any damage or loss to these materials BVFCL will not be responsible for the same. The steps for the job given below:

1. The unit will be kept de-energized will be completely isolated from both HT and Control supply. After that the static electricity will be discharged to ground. This will be under the scope of BVFCL.
2. Checking and recording of the IR value and Polarization index of Reactor. (BVFCL's Scope)
3. Draining of the existing oil.
4. Removing the inspection chamber covers.
5. Manual flushing of the interior of the unit with warm (at 40 Deg C) new oil through the inspection chambers. It has to be ensured to flush down the core and coil as much as possible. Then vacuuming or pumping the remaining fluid from the bottom of the tank. The vacuum will remove the remaining air/gases inside the tank.
6. Completing the above process with in 15 to 45 minutes depending on weather condition to avoid contamination and sealing the inspection chamber with new high quality gasket as soon as possible.
7. Filling of the tank with new transformer oil under vacuum and continuous filtration (Max. Temp of oil shall be maintained below 70 Deg C). The filtration record such as oil temperature, vacuum level, oil level etc. shall be maintained and chronologically documented.
8. Testing of BDV and Moisture content of oil intermittently and test result shall have to be documented.
9. After completing the filling and filtration, the oil shall be tested for BDV & Moisture content and IR, PI Ratio test are to be done. If test value found satisfactory, handing over the Reactor to BVFCL for charging.

**BVFCL's OBLIGATIONS**

- i) Guest house Facility for Contractor's Engineer only to the extent possible may be made available on chargeable basis during commissioning of the motor at site.
- ii) Temporary gate pass facilities for Contractor's engineer will be extended on application in standard format as prescribed
- iii) Safety work permit for carrying out job shall be made available.
- iv) Medical facilities to the extent possible shall be extended on chargeable basis at the rate as applicable to out side party.
- v) Power supply will be given on free of charges at the nearest location.
