BRAHMAPUTRA VALLEY FERTILIZER CORPORATION LIMITED

(P.C. Gupta)

Dy. General Manager (Finance)

Enclosed: As above.

BRAHMAPUTRA VALLEY FERTILIZER CORPORATION LIMITED
NAMRUP
(A Govt. of India Undertaking)

Invitation to Bid Document for Appointment of Consultant for Implementation of Goods and Services Tax (GST).

NIT No.: A/XII/2017-18/GST/AKS Date: April 27, 2017

1.0 About BRAHMAPUTRA VALLEY FERTILIZER CORPORATION LIMITED:

1. Brahmaputra Valley Fertilizers Corporation Limited (BVFCL) was incorporated on 5th April 2002 after segregation of Namrup units in Assam from Hindustan Fertilizer Corporation Limited (HFCL). BVFCL is a Schedule- 'B' CPSE in Fertilizers Sector under the administrative control of Ministry of Chemicals and Fertilizers, Department of Fertilizers with 100% shareholding by the Government of India. Its Registered and Corporate offices are at Namrup, Assam.

The complex had its first group of plants named Namrup-I consisting of one Sulphuric Acid (2x125 TPD), one Ammonium Sulphate (3x101 TPD) and one 167 TPD Urea-Ammonia plants commissioned on January 1969. All these plants were established with gas as feedstock for the first time in the Country and now closed/ scraped. There were expansion of urea capacity with commissioning of Namrup-II and Namrup-III ammonia urea plants in October 1976 and October 1987 respectively. These plants are in operation and stand as the only urea producing units in the Eastern part of the country.

1.0 1.2 Production Units: Its two operating Units: Namrup-II & Namrup-III consists of Ammonia, Urea and Utilities plants. Capacity of Ammonia Plant of Namrup-II is 480 MT of Ammonia per day and urea plant is of 800 MT (400x2) of urea **produced in two streams**. Capacity of Ammonia Plant and Urea Plant of Namrup-III are 558 MT per day and 900 MT per day respectively.

Namrup Fertilizers Complex is situated at the bank of Dilli River and draws the water required from it. Two numbers of gas turbine of capacity 15 MW each, generate electricity to meet the power demand and raise steam for utilization in the complex. The complex is also connected to the state grid to draw the power as per the requirement in case of internal power failure. The Service Boiler in Namrup-II generates 75 MTPH steam at 39 Kg/cm² and 300°C whereas Service Boiler in Namrup-III generates 86 MTPH steam at 47 Kg/cm² and 380°C and the steam so produced is consumed in Urea plant-II & III respectively. It has two auxiliary Boilers of capacity to generate 50 MT steam at 134 Kg/cm² for Namrup-II and 120 MT steam at 110 Kg/cm² for Namrup-III.

The end product - piled Urea - is sold under the brand name of 'MUKTA'. The complex is well connected with rail/ road and the product is dispatched and sold in the States of North East, West Bengal and Bihar. Both the units are having facility for 100% Neem Coated Urea production as per Gol directive and currently the company is producing only neem-coated Urea.

1.1 Beside urea production, bio-fertilizer and Vermi Compost are manufactured and sold to farmers through existing dealer network. To increase market acceptability, the company has gone into trading business of seeds, pesticides and fertilizers (MoP, DAP, SSP, Rock Phosphate, and micro nutrient).

1.2 Feed Stock:

- a. Natural gas is the only feedstock and fuel for the existing plants of BVFCL Namrup. Natural gas is transported from the near-by oil/gas fields through pipeline of about 30 km length. The following agreements are in place for supply/transportation of Natural Gas:
 - (i) Gas Supply & Purchase Agreement (GSPA) with M/s OIL
Quantity: 1.72 MMSCMD on firm basis (Validity upto 31.03.2022)
 - (ii) Gas Transportation Agreement with M/s Assam Gas Company Limited, Duliajan (Assam State Govt. Undertaking) (Validity upto 25.03.2020.)
- b. The existing GSPA with OIL is on firm basis for confirmed availability of 1.72 MMSCMD of gas. OIL has been approached for higher supply of natural gas at local level, at corporate level and ministry level. However, they have expressed their inability to supply any additional gas.
- c. BVFCL requires 1.95 MMSCMD of gas to run both Namrup-II and Namrup-III Plants at full load. At present due to limitation in gas supply to 1.72 MMSCMD against requirement of 1.95 MMSCMD, Namrup-II plants are operated at 50% load only. There is shortage of 0.23 MMSCMD of gas.
- d. Beside there is shortage in actual supply of Natural Gas during summer months at an average supply of 1.60 MMSCM. This results in restriction in plant load. During the year 2015-16 (upto 31.12.2015) there has been production loss of 14,851 MT of urea due to NG shortage. Production loss due to Natural Gas during previous years 2010-11, 2011-12, 2012-13, 2013-14, 2014-15 and 2015-16 were 35530 MT, 7220 MT, 16973 MT, 16536 MT, 2406 MT and 15,108 MT of urea respectively.
- e. Units of BVFCL being situated in the North-east, gets concession in gas price to the tune of 40%. From 01.10.2016 the cost of Natural Gas is \$1.50 per MMBTU (60% of \$2.50) which comes to a Basic price of around Rs.3.50/ SM³ at exchange rate of Rs.66.75 per US\$.
- f. The periodicity of price determination/notification is half yearly. Based on actual international price, the gas price is being fixed.

1.3 Present Status of the Operating Units:

- a. Namrup-III: Namrup-III plants are operating at 100% load on sustained basis. However the plants suffer from obsolescence and ageing of equipments. These lead to lower on-stream days affecting annual production.
- b. Namrup-II: The actual available urea capacity of the plant is limited to 50% and actual capacity utilization is often lowered due to reasons as under:
 - i. The plants are underperforming due to obsolete technology, frequent equipment failures and non availability of original spares.
 - ii. The available capacity is restricted to 50% capacity due to limited supply of Natural Gas to 1.72 MMSCMD against total requirement of 1.95 MMSCMD.
 - iii. Old technology adapted in the units.
 - iv. Old age of the plants and Non-availability of spares due to obsolescence.

1.4 Marketing, Sale & Distribution: BVFCL distributes and sales the manufactured Urea under the brand name “Mukta”. Urea is sold through its dealer network to North Eastern States, West Bengal and Bihar also exports to Nepal. BVFCL is major supplier of urea in North-East region.

1.5 Bio-fertilizers & Vermi Compost:

BVFCL is successfully producing and selling Biofertilizers. The capacity of the unit is 20 MT annually. 4 strains of Bio-fertilizer can be produced namely Rhizobium, Azotobacter, Azospirillum, Phosphate Solubilising Bacteria.

2) Eligibility Criteria:

- a. **Turnover:** Turnover of Biding entity should be at least Rs 10.00 lakhs in any of the 3 (three) previous financial years ending 31st March 2016.

The Bidder will provide the Audited Accounts for the above said period.
