Terms & Conditions

Sealed Tenders are invited by Brahmaputra Valley Fertilizer Corporation Limited (BVFCL), Namrup to engage a **BEE EMPANELLED ACCREDITED ENERGY AUDITOR FIRMS FOR PAT M&V** for Monitoring and Verification under PAT-II cycle separately for Namrup-II & Namrup-III units of BVFCL plants as detailed in Scope of Work.

1.0 BACKGROUND:

- 1.1 Brahmaputra Valley Fertilizer Corporation Limited (BVFCL) is a Central Public Sector Undertaking (CPSU) which is located at Namrup in the North-Eastern State of Assam and had originally come into production w.e.f. 1st January 1969 under The Namrup Fertilizer Plants of erstwhile Namrup Fertilizer is the pioneer to use associated natural gas as the feed stock and fuel for production of ammonia/urea. It is the only Urea producing unit in the whole of North Eastern states, West Bengal, Bihar, Jharkhand etc.
- 1.2 Hindustan Fertilizer Corporation Limited (HFCL) was carved out of FCIL in 1978 by including Namrup Unit and three other Units/Divisions of FCIL. Namrup Unit of erstwhile Hindustan Fertilizer Corporation Limited (HFCL) was again separated out and a new company in the name of Brahmaputra Valley Fertilizer Corporation Limited (BVFCL) was formed w.e.f. 5th April 2002. The Company is registered under Company's Act 1956 with its registered and corporate office at Namrup, and Liaison Office at NOIDA and Kolkata.
- 1.3 Namrup plants were originally installed in three phases as Namrup-I, Namrup-II and Namrup-III and presently Urea is the only finished product. It has the effective derated present daily Urea production capacity of 900 MTPD of Urea in Namrup-III and 400 MTPD of Urea in Namrup-II. Namrup-I plants have been decommissioned and disposed off.
- 1.4 The existing running production facilities of BVFCL consist of two ammonia and urea units each with total originally installed design capacity of 1200 MTPD Ammonia (Namrup-II: 600 MTPD & Namrup-III: 600 MTPD) and 2167 MTPD of Urea (Namrup-II: 1000 MTPD & Namrup-III: 1167 MTPD). Namrup-II and Namrup-III commenced production in phases in 1976 and 1987 respectively. Namrup-II and Namrup-III plants use associated natural gas available from the surrounding oil/gas fields of M/s Oil India Ltd (OIL) as basic raw material for producing Urea. Each of Namrup-II and Namrup-III plants has exclusive supporting Utility facilities like Water Treatment Plant, DM Water Plant, Steam Generation Plants and common 2x15 MW Captive Power Plant.
- 1.5 The plants were set-up in phases during the last 50 years and are based on old, obsolete, unproven and vintage technology. Because of frequent failures and other teething problems, the company is unable to make net profit by running these two plants, even after considerable investment.
- 1.6 Namrup-II and Namrup-III plants were revamped during the years 1998 – 2005 with derated annual production capacities and limited scope, only to bring in some reliability in operation. Though some degree of operational reliability could be established from the said revamp, the energy consumption in these plants continued to remain high, compared to present generation plants, primarily due to lower plant capacity, old energy intensive process & obsolete technology adopted in these plants and frequent production interruptions from retained inefficient & old key machinery/equipments, most of which are obsolete and OEM spares are not available.

- 1.7 Internationally renowned Process Licensors like M/S PDIL and M/S HTAS were engaged to conduct health study of the present plants and it has been opined by them that for long time survival of the company, a brown field ammonia urea plant should be set-up at the existing location, which will be able to produce more than double the present reassessed plant capacity by using the same quantity of feedstock.
- 1.8 In view of the strong readily available above infrastructure and experienced manpower for manufacture and marketing of fertilizers, BVFCL intends to setup a larger capacity natural gas based Ammonia-Urea Plant based on state-of-the-art modern technology, at a most energy efficient way, at par with the achieved level in modern gas based mega capacity urea plants in India.
- 1.9 BVFCL proposes to setup a Brownfield natural gas based highly energy efficient Ammonia-Urea Plant of 12.70 LMTA of urea production capacity based on state-of-the-art modern technology. The same will be replace the existing plants.

2.0 OBJECTIVE:

- 2.1 *BVFCL NAMRUP* is intended to engage an adequately qualified and experienced **BEE EMPANELLED ACCREDITED ENERGY AUDITOR FIRMS FOR PAT M&V** from the BEE EMPANELLED energy auditing companies for Monitoring & Verification of PAT Data to prepare/assist BVFCL to prepare and submit a few statutory forms of BEE separately for BVFCL plants in Namrup-II & Namrup-III for 2nd Performance Achieve & Trade (PAT) cycle completed on 31st March 2019 as detailed in Scope of Work.
